

To Whom It May Concern:

I am excited to apply for the position at your company. With over 10 years of experience in software development, quality engineering, and DevOps, I bring a strong track record of building scalable test automation frameworks, managing CI/CD pipelines, and advancing ModelOps/AI initiatives. My career has been defined by improving delivery efficiency, enabling cross-team collaboration, and ensuring the reliability of mission-critical systems.

In my current role at Lido Advisors, I manage GitHub Actions CI/CD pipelines and Azure resources while leading QA automation across 40+ projects. I have also implemented a unified QA and development framework (SDLC) for the DevOps department and helped establish ModelOps practices to integrate AI into production workflows. Previously at Revel Systems, I designed and executed hundreds of automated tests using Cypress, K6, and Postman, while ensuring software quality through GitLab CI/CD pipelines and microservice release validation.

My current accomplishments:

- Designing and implementing hundreds of automated test cases with JavaScript (Cypress, Mocha, Chai) and Python (Pytest, Selenium, Playwright).
- Building and maintaining performance and API test frameworks using K6, Postman, and Cucumber.
- Managing large-scale automated test suites with 190+ tests and integrating them into CI/CD pipelines.
- Driving adoption of ModelOps and MLflow for AI workflow testing and monitoring.
- Training and onboarding QA and DevOps engineers to strengthen team performance and knowledge sharing.

My technical expertise spans GitHub Actions, GitLab CI/CD, Azure, AWS, Python, JavaScript, and SQL, and I hold multiple certifications including Microsoft Azure AI Fundamentals, ISTQB Advanced Test Automation Engineer, and AWS Cloud Practitioner. With a Master's degree in Information Technology (4.0 GPA), I combine technical depth with leadership skills to bridge development, QA, and DevOps practices.

I am eager to contribute my skills in DevOps, QA automation, and AI enablement to your team. I would welcome the opportunity to discuss how my background and expertise align with your company's goals. I can be reached at (352) 275-8997 or justinkurdila@gmail.com

Sincerely,

Justin Kurdila, MSIT
